

***MSDS Internet Solution  
Procter & Gamble***

The Procter & Gamble Material Safety Data Sheet Internet solution is a company-wide system which provides the required data sheets to all employees at all times. This HTML search tool is located on the P&G Intranet and reaches out to the Internet to find vendor specific and/or generic MSDS information for internally used chemicals.

This system allows the user to choose first the database to search then specify if a particular manufacturer is desired. It currently includes internally produced perfumes, and future editions will include intermediates and foreign language translations.

Features include:

- Ability to choose database to search
- Specific Manufacturer sheets
- Search transaction abilities
- Tips on searching
- Information on databases that house MSDS information
- Easy and cost-effective development and maintenance.
